

Time: May 29th (Tues.), 2012 13:00-14:30
Place: 3rd Floor Lounge, Environment Bldg.

Open to Everyone / Casual discussion of sustainability-related issues: 30-minute talk by guest about his or her research and its relation to sustainability; remaining time = free discussion / monthly

SUSTAIN.CAFE by **SUS-EDU**

*Resource limitation? Renewable energy? Climate change?
Environmental technology? Environmental regulation? Environmental
economy? Internalization of external economy? Environmental
management? Environmental governance? North-South Issue? Human
rights? Ethics? Norms? Meaning of life? Change of value system?
Sustainable consumption? Transition management? Environmental
education? Development Education? Education of human rights?*

So many things here.

What should we learn?

Maybe we should learn how to study rather than what to study.

*I'd like to share my personal thoughts through 6 year-experience in
sustainability education.*

What shall we do at "Sustainability Science"?

01 Professor Motoharu Onuki
